Let the Good Times Roll

# Z E-1 SPORT FEATURES

## No-Clutch Operation

Having no clutch to operate—riders need only twist the throttle—greatly simplifies operation and contributes to a rider-friendly package.

## TFT Colour Instrumentation

4.3" all-digital TFT colour instrumentation gives the cockpit a high-tech, high-grade appearance, while being able to connect to your ride wirelessly offers an enhanced motorcycling experience.

## Regenerative System

Thanks to the regenerative system, when the rider rolls off the throttle the energy of deceleration is recycled back to the battery. This contributes to a longer cruising range.

## e-boost Function

With e-boost, riders can access increased power for approximately 15 seconds. When activated, acceleration is stronger and top speed is increased: 64 km/h >> 75 km/h (ECO), 88 km/h >> 99 km/h\* (ROAD). [62 km/h >> 72 km/h (ECO), 85 km/h >> 99 km/h\* km/h (ROAD) for Z e-1] \*EUR spec: Top speed limited to 99 km/h in Europe.

## Zero Emissions

Powered by an electric motor, the Ninja and Z e-1 create no emissions when being operated.

## Naturally Relaxed Riding Position

Relaxed rider triangle accommodates a wide range of rider sizes and riding situations, contributing to the rider-friendly character. The relatively upright riding position and slightly foot-forward footpeg position put the rider in a position to control the bike while also offering rider comfort.
